13 The under ground Sewerage of the Bangal City and the Sewage treatment and Disposal works are of a highly technical nature and the services of a young energetic officer are essential for the satisfactory execution of the works. It is very essential that the works should be under the control of the Director of Public Health, especially during the Construction Stage Mr N R Seshadri Iyengar has been recently promoted and posted as special officer for the Drainage works The proposal of the Municipality to re-employ Mr N Krishna Iyengar who has retired from Service from 16 B-1942 will have to be vetoed, as he is now past 56 years of age and too old for such special works.

Dy Secy 26/11/42 Asst Secy 29/11/42 Govt

To

H V Narayana Rao, Esq, B A, LL B,
SECRETARY TO THE GOVERNMENT
OF HIS HIGHNESS THE MAHARAJA OF MYSORE
LAW DEPARTMENT BANGALORE

SIR

I have the honour to state that it is quite necessary that thi Municipality should maintain trained staff to attend to surveys and planning of new lay-outs, to expedite house connections to undergroun sewers and to complete and look to the maintenance of the underground drainage lines in the Bangalore City As the financial resources of this Municipality do not permit the entertainment of the extra establishment for the purpose, a proposal was placed before the Managing Committee in the first instance in the matter of re-employing the present Special Officer in-charge of the Drainage Works, Bangalore City who is to retire shortly and also to transfer the establishment now working under the said officer to the control of the Municipal Commissioner This proposal was approved by the Managing Committee on 19-2-1942 and by the Council on 14-3-1942 Copies of the resolutions of the Managing Committee and the Council together with a copy of my note in the matter wherein the facts of the case have been fully explained are herewith forwarded I request that the sanction of Government kindly may be kindly obtained to re-employ after his retirement the present Special Officer in-charge of the Bangalore City Drainage Works on half of his present pay which may be borne in equal proportions both by the Government and the Municipality and also to

transfer the

to transfer the establishment now working under him to the control of the Municipality

I have the honour to be,

LAY OUT FOR EXTENSIONS AND SEWAGE HOUSE CONNECTIONS

=o=

Lay-Outs -

The population of the City is rapdily growing and along with it the Municipal area also Several private applications for lay-outs of sites have already been sanctioned, and others are being received for approval and -- sanction The Municipal Council also, has in its view, the formation of new additions to the built area by acquiring open spaces in the municipal limits and laying out the areas into house sites

This developments which is bound to expand as time goes on, needs careful direction and watchfulness, so that the City grows on systematic lines without getting over-crowded as some of the extensions have already been and with an eye towards aesthetics, the comfort and convenience of the house-builders

At present, the additions to the town are rising in bits and irregularly, on no accepted principles of modern town planning and without reference to contiguous existing areas and their contours The result has been the difficulty in the formation of roads without ~~xxxx~~ unnecessary curves and grades and difficulty in the provision of drains

House connections to sewers -

The underground drainage project for the whole City has been just sanctioned by Government This was an urgent necessity for this beautiful growing town, which is the -- admiration of all visitors The work has already progressed and, practically the whole of the crowded portion of the City proper has been sewered at an estimated cost of over 12 or 13 lakhs of rupees The justification for the investment of this huge amount should be found in the improved sanitation of the town Then all the houses have connected their sewage outlets to the street sewers below-ground, asuch an improvement is bound to be felt At present, the number of house connections is gradually on the increase but yet, the result is not felt down below, in the pipe line, as the connections have not been systematically taken by all the houses in any particular street or area Taking connections only here and there, though good enough to swell the number of such connections will only result in the accumulation of flushed matter in the middle of the pipe line or in the manholes

The existing establishment in Engineering and Health sections are now attending to the town-planning and house-connections works respectively It is felt that these hands with their hands already overfull of routine work, cannot - devote all the attention necessary for these important items of special works

The Municipal Engineer is already doing his best in matters of routine municipal engineering, without enough of subordinate help and this responsible work of town-planning involving field-work of surveying drawing in Office and laying out on fields is one, which it is no longer reasonable to tackle him with, without additional establishment especially in view of the evergrowing works in the City

The Municipal Health Officer is now entrusted with the responsibility of seeing to the rapid increase in house-connections He is doing his best considering that the work is purely technical and more of engineering than of health He could ill-afford to do better as his legitimate Health Department duties are already multifarious and even on the increase, on account of the city limits extending in all -- directions Additional establishment is felt to be necessary to attend to this work systematically and to exercise adequate supervision and check over the works and estimates of the - licensed plumbers As a matter of fact, this work of sewer connections is everywhere attended to, by the agency which is entrusted with the laying of sewers and not by the Health Officer

As our financial resources do not permit of the entertainment of extra establishment by the Municipality, the -- following suggestions are offered -

The special drainage establishment whose salary is charged to works have finished the preparation of the project under expert guidance, and the project itself has also been sanctioned Works have progressed appreciably and the required lead has been given It seems no longer necessary to keep that establishment separate from the Municipality In fact every other important Municipality has a special, trained drainage staff attached to it, and this Municipality has a special trained drainage staff attached to it, and in area certainly requires such a trained personnel to - ~~xxxx~~ continually attend to the requirements of the growing additions to its limits It is therefore proposed that -- Government may be requested to transfer the establishment to work under the Municipal Commissioner They will continue to work out the remaining portions of the project and attend to the expediting of the house-connections systematically Incidentally one or two of them may also be drafted, off and on, to attend to surveys and planning of new lay-outs as they come and thus the Municipality will have a full compliment of the required trained staff to attend to these important works So long as the project work is under progress, their salaries are charged to works and the Municipality ~~xxxxxxx~~ will not be called upon immediately to bear any extra cost on this account

The present Special Officer in charge of the Drainage Works is about to retire shortly It is proposed to approach the Government to re-employ him as Special Engineer for a year or two in the first instance, in view of his wide -- municipal and sanitary experience both in Mysore and here It will be cheaper too, to re-employ him, as half his -- present salary will be charged to pension funds and the other half only will be charged to works and debited to Government and the Municipality in equal proportions The benefit of his full and long experience will thus be ~~had~~ made available to the Municipality at practically no cost or at a far lower cost than has to be incurred in case a new Officer is employed There have been precedents in this Municipality itself, when retired experienced Officers have been re-employed as Special Engineer on account of their -- experience viz Messrs D'cruz and Vijyarangam Naidu
